DUST PROOF

4AA Mini Q40 XENON LIGHT

Instructions & Important Information

Thank you for purchasing this UK dive and outdoor light! You will find it to be incredibly bright and ready when you need it. The high

intensity xenon lamp outperforms lights many times its size

For over a 30 years, UK has been designing and manufacturing scuba lights to enhance the diving experience. We believe that it is important to take at least one light on every dive just to see the incredible beauty that lies hidden in the shadows under coral and rocks. Our lights are the standard for scuba divers around the world. We have designed all of our lights to be incredibly bright, rugged, compact, and waterproof to at least 500 feet. You can be assured that each light includes the latest technology and is the brightest, smallest and most powerful in its class. With minimal care your Underwater Kinetics light will give you years of trouble-free service.

Battery Installation

To install batteries, hold the case in the position shown. Drop the batteries one by one into the case in the order shown. Make sure that the (+) end of the battery is down for 1 and 2 and up for batteries 3 and 4. Next insert the lamp module into the case. Place the bezel over the lamp module and screw it onto the case.

ON / OFF

To operate the Mini Q40 screw the bezel down by twisting clockwise until the lamp comes ON. Turn the light OFF with at least 1-1/2 counter-clockwise turns of the bezel.

Xenon Lamp Module

The xenon lamp module is an integrated unit. There are no replaceable parts. The xenon filled lamp is located and sealed at the prime focal point of the reflector for maximum beam intensity.

O-Ring Seal

The O-ring and sealing surfaces must be kept clean and lubricated with silicone grease in order to maintain the watertight seal and smooth rotation of the bezel. During cleaning remove the O-ring with your fingers. Do not use tools which can damage the O-ring and sealing surfaces.

Care and Maintenance

■ Keep area around the O-ring clean.

■ For longer lamp life, turn the light on for several minutes after loading fresh batteries to "age" the batteries.

■ If the light floods, empty it immediately, rinse with fresh water and dry completely before reassembly.

■ Replace the reflector/lamp, which contains a hydrogen absorbing catalyst, if it gets wet.

■ Do not store batteries in the light for long periods of time; they may leak and damage the light.

Limited Lifetime Warranty

UK International products are engineered for maximum performance and durability. All products carry a Limited Lifetime Warranty to the original retail purchaser to be free from defective material and workmanship under normal and intended use. In addition, the UK International Limited Warranty covers materials used in its products to the original purchaser, as follows: plastics for 10 years; fabrics and rubber for 3 years; rechargeable batteries for 90 days; and lamps for 30 days (batteries and lamps are not manufactured by UK International).

In the event the original retail purchaser detects a defect in the material or workmanship, the product along with proof of purchase date should be returned to an authorized UK International dealer or directly to UK International with the postage prepaid. UK International agrees to repair or replace at UK International's sole discretion any product found to be defective in material or workmanship within the time period specified above. For the complete Limited Lifetime Warranty write to UK International.

Address all correspondence and returns to:

UK International

Poway, CA 92064

Note: The Mini Q40 will not light if the batteries are not inserted with the polarity as shown.

CAUTION

Batteries can vent hydrogen gas and possibly cause an explosion if they are (1) installed without the proper polarity, (2) not the same type, brand name and age or (3) completely discharged.

- > Load batteries according to the diagram.
- > Discard all batteries as soon as they are drained or no longer produce light.
- > Do not mix batteries of different type, brand or age.
